## GUINOT PEELS

### HYDRA PEEL

Guinot's HYDRA PEEL treatments exfoliate, resurface, moisturise and renew the skin. Hydra Peeling with Hydra PH uses Phytic Acid while Hydra Peel with Hydrabrasion uses natural cellulose particles and papaya extract. Hydra Peeling offers two versions of the peeling component, the first with Acid PH for all skin types; the second, gentler, for sensitive skin with manual Hydrabrasion.

Both peels are completed with a skin regenerating cream and massage phase and then with a soothing, beauty-enhancing mask. In just 45 minutes the skin will feel wonderful, revitalised and re-energised. Both treatments minimise brown spots, smooth out the texture of the skin, increase radiance, minimise signs of aging and deeply moisturise the skin. The best suited Hydra Peel treatment is determined based on the client's beauty goal and level of sensitivity. The skin will look more youthful and radiant and will feel beautifully clean and revitalised.

## MICRO-NEEDLING

**Micro-Needling Consultation** €25  
(Fully redeemable against any treatments or products purchased on the day of the consultation)

**Micro-Needling** €175

*What is micro-needling?*

Micro needling is also known as collagen induction therapy or skin needling and it is a cosmetic procedure that involves repeatedly puncturing the skin with tiny, sterile needles. Micro needling penetrates the skin at an even deeper level than Mesotherapy and creates micro injuries in the deeper levels of the skin. These micro injuries kick-start the body's own repair mechanisms and trigger the production of collagen and elastin at a cellular level.

More collagen and elastin means smoother, brighter and younger looking skin which is probably why it is a favourite with many celebrities including Kim Kardashian, Gwyneth Paltrow even Brad Pitt!

*The treatment & does it hurt?*

To ensure a comfortable treatment a numbing cream is applied to the skin before your treatment so that you feel no or at best minimal discomfort.

You can expect some down time with this treatment and you can expect your skin to be red and tight similar to light/medium sunburn for a time after the treatment and you can expect some skin shedding over the course of the next week. This is all a natural part of the healing process. After a couple of treatments most clients find that there is considerably less down time however we do not recommend this treatment within a week of any special events.

**For optimum results we recommend 3-6 treatments dependent on the condition and age of your skin.**

## ELYSION LASER HAIR REMOVAL

The ElySION laser hair removal platform is the most advanced, high quality Diode laser for hair removal. What sets ElySION apart from other laser options is the integrated 'Crystal Freeze' cooling technology which keeps the skin at a cool 5° during treatments. ElySION offers two modes of operation, Static and Dynamic and the combination of the two operating modes allows application to small and large areas of skin giving excellent results from even the first session (high density thick hair) or later sessions (residual, finer and less dense hair).

The ElySION platform is designed to work for all skin and hair types with ultra-fast treatment times and is suitable for both male and female clients.

A consultation and patch test is mandatory for laser hair removal however the consultation cost is fully redeemable against any ElySION treatments booked on the day. This treatment is only suitable for clients over 16. Clients between the ages of 16-18 must have written parental/guardian consent.
